

# **Table a - Supporting Wood and Biomass Mobilization**

Facilitator: ZIESAK Martin (ROSEWOOD H2020 Project) Notes: LINK Tabea (Steinbeis 2i GmbH)

## **Local charcoal as strategic tool for bioeconomy in “Vicenza Piccole Dolomiti” area**

Marco Grendele, LANDES Group

## **Forest LidaRioja: Updating and enhancement of forest data in La Rioja region using remote sensing technologies: LiDAR and satellite data -**

David Garcia Castillo, AGRESTA

# Goals of the Table Discussion

- improving the understanding on the presented cases
- learning about the experiences from Operational Groups
- raising awareness on how Rural Development Programmes could help in spreading and realizing the presented ideas, in particular with EIP AGRI Operational Groups (or Focus Groups)
- indicating intentions/opportunities for cross-border cooperation (which regions; intended partners to implement/further improve the innovation issue)
- identifying opportunities to spread the idea or establish cross-border cooperation through other relevant EU programmes/instruments
- proposing new ideas/cases related to the topic/innovation challenge, in addition to the aspects dealt with by the presented cases

# Supporting Wood and Biomass Mobilization - Main Messages

- There is a need for digital infrastructure, e.g. funding for Lidar data acquisition
- Access to these data must be regulated in an adequate way
- We need to have better communication strategies
- Added value products out of local wood, e.g. charcoal, have a positive impact
- International cooperation partners sought for scale-up and replication
